Conex™ Access

Access control, video surveillance,
time and attendance, visitor management

The key for more comfort and safety

Conex™ Access combines access control, time tracking, video surveillance and visitor management intuitive in one software.

One key for everything

Your key not only opens doors, serves as a digital time card, switches the alarm system on or off, but also acts as an employee card or as means of payment for the coffee machine.

It does not matter if the key is a card, their mobile phone, a biometric feature, RFID or the license plate of your car.

Intuitive

With intuitive operation and customizable user interface, Conex™ Access offers all the options with reduced training time.

In compliance with legal requirements

Secure legally compliant storage and retention as well as easy management of permissions or access.

Easily expandable and reliable

The robust and flexible design makes Conex™ Access suitable for SMEs, as well as nationwide high availability solutions with complex security requirements, such as: Rights management, and can be extended at any time. Various redundancy variants can be implemented.

Central administration and monitoring

Centralized administration of all Voxtronic products as well as SNMP-compatible devices. Individual reports enable intelligent and planned management of individual and distributed communication systems.

Smart Communication.

Voxtronic.

Access, time track and visitor management

Regardless of the size of the company, only authorized persons may enter certain rooms. At the same time, visitors should receive easy and comfortable access.

Visitor management

The easy registration of visitors allows these company agreements to be signed. Your employees will be informed automatically about the visit.

Recording of working hours for employees and externals

The recording of working hours are made via web application, smartphone app or terminal. Integration options for electronic logbook or production data acquisition are included.

Online and offline administration of lockings

Management of locks and keys, access management and flexible authorization.

- Time zone plan
- Working schedules
- Public holidays
- Vacation

Biometrics reading systems

Integration of non-contact biometric reader for identification without media.

- 2-Factor identification: Maybe used alone or in combination with additional identification.
- Encrypted storage of biometric data.

Easily Expandable.

Voxtronic.

Security simply provided

A simple installation without mechanical changes in the door allows the use in all conceivable premises or rental properties.

Digital locking systems

- Access control in every door
- Simple and non-destructive installation in every door
- Suitable for rental properties
- Wiring-free direct networking

Mechatronic systems

- Smart key, also available online
- Robust weatherproof, vandalism insensitive
- Low maintenance, as no battery is installed in the door

All In One.

Voxtronic.

Video surveillance

Conex™ Access protects operating systems and security areas by automated recording and documentation of adverse events in real time. Movements of people and cargo are constantly analyzed with regard to direction and frequency.

Live streaming

Allows you to view live images of connected video cameras.

Monitoring of loading zones

Supports operations in avoiding accidents and incidents.

Perimeter protection

The primary task of perimeter protection is to minimize or even prevent damage at an early stage. It is important to identify potential offenders at an early stage in order to initiate countermeasures in time. This can ensure that a violent intrusion is detected within a reasonable time.

Motion detection

Alerts the user audiovisual when detecting a movement.

Counting

Enables the counting of objects when passing over a defined limit. When thresholds are exceeded, users are automatically alerted.

Heatmap

Heatmaps display the areas with the highest activity.

Security.
